

INTRODUCING ANA THE FIRST AGFA :ANAPURNA M2050 PRINTER IN CANADA

Date: Jan 18, 2012

We would like to take this opportunity to wish everyone a very Happy New Year 2012 and to introduce WSI SIGN Systems Ltd. & our KING Architectural Products division to you.

Since its' inception in 1988, WSI Sign has grown from a small sign shop in Bolton, Ontario to become a Premier Architectural Sign Manufacturer in North America working with award winning Environmental Graphic Designers & Architects.

Recently we combined the operations of the WSI and KING divisions by expanding the existing KING plant & offices into a 45,000sqft. modern manufacturing plant equipped with state-of-the-art equipment and technologies. Our highly skilled sign fabricators and craftsmen create custom sign and related architectural products limited only by your imagination. Always ready for a new challenge, our team will take your project from concept to highly detailed reality, no matter the size or complexity. Our diversified manufacturing capabilities including; metal fabricating, CNC router and water-jet precision cutting, silk-screening, tactile and Braille ADA-compliant graphics and digital imaging to name a few, allow us to keep most of the manufacturing processes in-house, affording us greater control of quality, scheduling and cost. You can choose from our range of KING brand modular products or totally customized solutions tailored to your need. We have not only provided quality custom products for high profile projects from coast to coast in Canada and the United States, but also for projects across the globe in Europe, the Middle East & Asia. Our highly competent management has extensive sign industry and construction project experience and our impressive team of graphics, project management, coordinators, engineering/drafts-people and installers are focused on the details to ensure that your project is true to design intent and the final product is everything you expected and delivered on time.

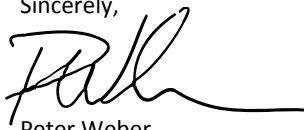

Keeping our focus on delivering high-end product we recently became the proud owners of the **1st AGFA :Anapurna M2050** printer in Canada. This unit is a High Speed UV Curable Inkjet System that delivers Top Class products at lightning speed (53 m2/hr). The Features of this printer are highlighted below:

1. Uses UV Inks in CMYK + LcLm + White. Cures instantly making prints ready to handle immediately.
2. Pre & Post White capability on 1st or 2nd surface print for backlit or print white on dark surface
3. Good ink adhesion ensures high image longevity and outdoor resistance.
4. Directly prints on rigid substrates up to 45mm (1.77" Thick) and 2050mm (80.7" Wide) borderless
5. Also prints on a variety of roll media from film, vinyl, paper, canvas & banners etc.,
6. Top quality prints at quality as high as 720 x 1440 dpi, capable of rendering crisp text as small as 4pt positive and 6pt negative.
7. Speed of 53 m2/hr in Express mode and 9 m2/hr in Photo mode for enhanced productivity.

In addition to the Anapurna M2050, we also have in our list of equipment, MUTOH Falcon II Solvent Jet printer, Mimaki & Summa vinyl plotters & laminators, Gravograph Laser & Rotary engravers with Raster Braille capability, OYO Thermal Imagesetters, NOVA Photopolymer plate processing station for NovAcryl signs (Photopolymer), Hot Stamping machine, OMAX JetMachining centers, AXYZ CNC routers, Elumatec saw and various metal fabricating & welding machineries consisting of hydraulic brakes, shears, drill, welders & saws etc., Our new paint booths come complete with separate sanding and curing booths and paint kitchen for Matthews & Akzo Nobel Automotive Paint Systems.

Please contact one of our experienced sales professionals or myself to discuss your project needs and what WSI & KING can do for you. You are welcome to come to our plant for a tour and to see the range of processes and products we can offer.

Sincerely,

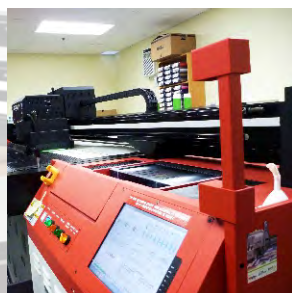

Peter Weber
President
